SNiPER® - The Future Intelligent Disinfection Technology

SNiPER® has been tested effective as a bactericide, virucide, and is the Ideal Biocide for Funeral Homes, Crematories, and Coroners. SNiPER® proprietary formulation makes it a unique disinfection, cleaning, and deodorizing system targeting the most harmful micro organisms and VOC's while remaining eco friendly. SNiPER® has the highest efficacy and is easy to use. SNiPER® does not produce harmful byproducts or leave behind any residue and it does not produce VOC's. SNiPER® can be used on multiple surfaces without the need to wipe away. Use ONE product, SNiPER®, to effectively clean, disinfect, and deodorize. SNiPER® is a broad spectrum "hospital" disinfectant-cleaner which provides "the new era of disinfection quality and dependability"!

Clean - Disinfect - Deodorize

- All-Purpose, multi-surface cleaner
- Superior Odor eliminator
- Broad spectrum "Hospital" Disinfectant

SNiPER® is packaged in an exceptional ready-to-use solution that addresses the challenges of keeping a clean and safe environment where harmful pathogens from bodily fluids and the use of harsh chemicals can be a serious concern. SNiPER® is the Ideal Disinfectant cleaner that can address a broad range of targets without the affects of harsh chemicals that are corrosive and toxic to personnel.

Clean - Disinfect - Deodorize: Kills harmful Bacteria and Viruses

- Embalming / Prep Rooms
- Drains (in prep room)
- Disinterment / interment Caskets
- Autopsy
- Tables
- Cutting instruments (Face shields)
- Decomposition Bodies
- Crematories
- Sinks
- Refrigeration
- Hearse / transport vehicles

SNiPER® does not mask odors or produce noxious fragrances or scents, it simply eliminates odors. SNiPER® breaks down biological contamination attacking the source of the odor. It is ideal for using around people with allergies, is eco friendly and will not produce volatile organic compounds (chemical fumes).

- Embalming / Prep rooms
- Caskets
- Crematory rooms
- Vehicles
- Drains
- Etc.
- Bathrooms
- Refrigerators

After preparing a body for viewing use SNiPER® to:

Treat the body for odors (residual formaldehyde, odors on the face, lips, etc)
Treat the air in the room for residual odors or during formaldehyde applications

SNiPER® is an Effective, Highly Selective Oxidizing Odor Eliminator

VOC's

SNiPER® actively mitigates volatile organic compounds such as ammonia, formaldehyde, hydrogen sulfide and other odors produced from chemicals such as Dryene, bleach, and can replace toxic products such as Formaldegone.

Unlike Many Other Chemicals Used, Sniper Is Non-Flammable, Non-Corrosive, Non Abrasive and great To Use On Many Surfaces!
